Project description
Part#3: Web Automation testing

I. Description
1. Study one open-source web automation testing tool.
2. Use the tool to test one of the application in project #2.

II. Report
- Report file type: .pdf and .xls(x) and source of the code(s).
- Review the tool with a short description how to use the tool.
- Show the way to apply the tool to test your application.
- Show the test results.

III. Applications to be tested

As in project#2.
